

APSC 199: Individual Summary and Peer Feedback

Course Learning Outcomes

The activity will assess the following Course Learning Outcomes:

5. Deliver informal presentations to a small group with suitable language and content, making concepts clear to the audience.
6. Respond to oral presentations with insightful questions and suggestions.

Overview

This activity is designed to help you develop the ability to deliver, listen, and respond to an informal presentation to your project team. It is also an opportunity to demonstrate your ability related delivering and responding to informal presentations.

To deliver a good presentation you should:

- prepare a presentation with an introduction, body, and closing.
- practice your presentation to ensure fluency, confidence, and timing.
- deliver in a clear, engaging manner, and use any visual aids you've prepared.
- make eye contact with your audience to establish a connection and convey confidence.
- speak clearly and at a moderate pace to ensure your audience can follow along.

To be an effective active listener:

- concentrate on what is being said rather than passively hearing the words.
- practice empathy by putting yourself in the speaker's shoes to understand their perspective.
- demonstrate professionalism by focusing on the presentations and by responding thoughtfully and respectfully.

Assignment instructions

Review the [Smith Engineering Major Maps](#) and select two programs that interest you – don't worry, this has nothing to do with your actual discipline selection!

For each program, identify **three** activities (design teams, clubs, programs, or other opportunities at Queen's that you could participate in) to help build skills and experience that is relevant to the discipline you chose to review. Explore some of the [design teams, clubs, and programs](#) at Queen's beyond those directly linked on the Major Map.

You will present one of the programs in a practice presentation, and the other one in your final formal presentation. In each case, your **3-minute** presentation must include:

- which discipline you chose to review
- which activities you chose to highlight and why
- what skills you think you would develop by getting involved in the activities you chose

There is no requirement to bring slides although you can bring other visual aids if it will help your presentation (e.g. a printed page, an image on a computer/tablet screen, etc.).

It is important that you only use very brief notes to use as a reference during your presentation. If you only read directly from a script or from your PPT slides, you may need to attend a follow up meeting.

Your practice presentation will happen in the Monday studio in Week 2.

- Come prepared to present your draft **3-minute** presentation to a small group
- Provide feedback to other students using the 5 Key Elements of Effective Feedback posted under **Content> Presenting, listening, feedback> Before studio** in the APSC 199 course site in OnQ.
- Reflect and use the feedback to refine your final presentation in Week 2.

In Week 2 you will present your second program to your team in the meeting with your project manager.

- Come prepared to present your final **3-minute** presentation
- Each person on the team will present once and each person will actively listen and take notes if necessary.
- Be prepared to ask questions and make constructive comments for at least two other presentations - aim for **3-5 questions or constructive comments** about the discipline choice, activities chosen, next steps for getting involved, or presentation delivery. Everyone should contribute to the discussion with their questions and/or comments.

The discussion period may last **3-5 minutes** and is dependent on the specific interactions with the Project Manager.

Grading

This activity will be graded using the rubric below.

Assessment

	Exceeds expectations	Meets expectations	Developing	Marginal	(Instructor follow-up)	
	7-8	6	5	4	0-3	
Overall Presentation [CLO 5]	Presentation is exceptional, demonstrating clear language and clarity.	Presentation is strong, with minor areas for improvement in language and clarity.	Presentation meets basic expectations but may require significant improvement in one or more areas to enhance effectiveness.	Presentation is below expectations, with notable deficiencies in language and clarity.	Presentation is not understandable and does not meet purpose. Presentation is read off a script.	/8
	7-8	6	5	4	0-3	
Questions and Discussion [CLO 6]	Respondent asks insightful questions and provides constructive suggestions that demonstrate deep understanding and critical thinking.	Respondent asks relevant questions and offers constructive suggestions, contributing meaningfully to the discussion.	Respondent asks some questions and provides suggestions, but they may lack depth or relevance at times.	Respondent struggles to ask meaningful questions or provide relevant suggestions, demonstrating limited understanding.	Respondent fails to ask questions or provide suggestions that contribute to the discussion, reflecting a lack of engagement or understanding.	/8
